

CERM-ESA Programmes

CERM-ESA has four major programmes that run concurrently.

1. The objective of the **Research Programme** is to build research capacity in the partner Schools of Education for sustainable institution building and excellent, innovative educational research in, about and for Africa.

2. The **Academic Programme** includes scholarships for postgraduate students in East and South Africa and focuses on teaching and training of future leaders in terms of research methodologies, innovative management solutions and instruction techniques on Master's and Doctoral levels.

3. The **Capacity Building Programme** offers opportunities for academic, teaching and administrative/management staff of all partner Schools of Education to further their education through professional development courses and workshops.

4. The goal of the **Teachers Professional Development Programme** is to support teachers and principals to advance their competencies in relevant areas of educational practice, curriculum implementation and management in their local contexts.
